

ROLE-02 — DevOps/Infrastructure Engineer Role Description

v1 | 2025-05-01 | Engineering | Role

1. Core Responsibilities 1.1 [M] Manage deployment pipelines and cloud infrastructure per SOP-01. 1.2 [M] ROLE-SPECIFIC (DevOps/Infrastructure Engineer): Maintain on-call rotation coverage for production systems.
 2. Working Hours 2.1 [O] Engineers on the on-call rotation may work non-standard hours at their discretion during on-call weeks. (This creates tension with HANDBOOK-01 Section 2.1's mandatory core-hours requirement.)
 3. Required Training 3.1 [M] Complete security training within 7 days of receiving production deploy access, per POL-03 Section 2.2.
